ADVANCING GREAT PLACES

2020 - 2025 - 2030

- Growing population
- Changing retail market
- Housing supply & demand
- Traffic & transportation
- Infrastructure & service needs

Let's build a great future together!

North Chickamauga Creek
Gorge State Park

Chester Frost Park

Poe's Tavern,
Soddy-Daisy

Cambridge Square,
Ooltewah

Planning for the efficient use of our limited resources is essential to creating a more resilient community.

Once adopted, Area Plans provide guidance for new development, zoning changes, capital improvements, and conservation.

COMPREHENSIVE PLANS

Do

- Guide physical growth
- Inform capital projects / budgets
- Inform rezoning decisions
- Inform private development location decisions
- Help residents build support for projects

Do NOT

- Change zoning
- Guarantee funding

PLACE TYPES

No two communities are alike. One-size-fits-all zoning will not give us the places where people want to be.

Rural

Suburban

Urban

Special

PLACE TYPES MAP & DESCRIPTIONS

SR **SUBURBAN RESIDENTIAL Place Type**

General Description: The Suburban Residential Place Type has a predominantly low intensity, single family detached, residential development pattern, especially with in the same block. Some moderate density residential development, such as small lot houses or attached townhomes, may exist, but are typically located on a major street or near a transit route or school. Moderate intensity retail development on sites adjacent to existing residential uses should maintain the existing rhythm and feel of the street. Factors that play into this rhythm and feel include lot width, setbacks, and building massing and height. Open spaces are typically private (back yards), but greenways may provide connectivity.

ADVANCING GREAT PLACES

RPA
Chattanooga-Hamilton County
Regional Planning Agency

(SR) Place Type

Location & Block Pattern

- > Large Suburban Residential subdivisions are accessed from a Major Collector Street.
- > While currently the predominant pattern is long blocks, with dead-end cul-de-sacs and a single point of access from a subdivision to a major street, new development provides for future connections to adjacent streets and properties to help reduce traffic congestion on the major roads.

Site & Buildings

- > Buildings typically have moderate setbacks of 10 to 20 feet.
- > Parking may be located to the front, side or rear, but is typically accessed from the front.
- > Driveways that directly access collectors or arterial streets are minimized to reduce potential traffic conflict.

Transportation & Infrastructure

- > Residences in this Place Type are generally further from key destinations than those in other Place Types; therefore, a personal vehicle is needed to reach daily needs and employment.
- > Fixed-route transit service is typically not feasible due to the low density of this Place Type.
- > Pedestrian and bike connections may be present if the residential development is adjacent to a commercial center, school, or major job site.
- > Residences in this Place Type are on sewer systems, but some older neighborhoods may have septic systems.

PRIMARY

Primary Uses (Predominant)

Single family detached

SECONDARY

Secondary Uses (Less Common)

Townhomes (with limited mixing of up to 4 units per building), multi-family 2-4 units per building, accessory dwelling units (ADUs), home occupations, ino-4-homes, vacation rentals, golf courses

Development Pattern: Densities can range from 1-10 dwelling units per acre or more, depending on a variety of factors (such as infrastructure capacity or proximity to schools or parks).
